

Cypress Test Report

Project Title

Form Submission Test — Cypress Automation

Tester: Silmara Costa

Date: April 17, 2026

Test Objective

Verify that the form can be successfully filled and submitted using automated testing.

Test Environment

- **Tool:** Cypress
- **Browser:** Microsoft Edge
- **Test URL:** <https://example.cypress.io/commands/actions>

Test Steps

1. Open the test page
2. Enter a valid email address in the input field
3. Submit the form

Expected Result: The system should accept the input and display a success message confirming the form submission.

Actual Result: The email was entered successfully, the form was submitted, and the success message "Your form has been submitted!" was displayed.

Status: Passed

Conclusion

The form submission functionality is working correctly. The system validates user input and responds as expected.

Automation Code

```
describe('Form Test', () => {  
  it('should fill form and submit', () => {  
    cy.visit('https://example.cypress.io/commands/actions')  
  
    cy.get('.action-email').type('test@email.com')  
    cy.get('.action-form').submit()  
  
    cy.contains('Your form has been submitted!').should('be.visible')  
  })  
})
```
